

Did you know that current Health and Safety legislation extends to employees who drive for work purposes? Do you have all the policies and practices in place to protect you and your company?

Are you maximising the fuel savings offered by the vehicle you are using and minimising the maintenance costs?

Sheffield City Council's Road Safety Section, working with Inmotion! is offering South Yorkshire businesses and organisations FREE driver education and company support aimed at improving safety, saving money, reducing collision rates and maintenance costs whilst helping the local environment.

We are hosting a free event on Tuesday 17 June 2014 at Holiday Inn (A1M) Doncaster, from 8:30am to 10:00am. The event will help you to better understand how your company and its drivers can benefit from this Government backed initiative.

Scheme overview

One of our specialist advisors will work with your business to develop a plan that will help you to develop policies and practices to minimise costs and maximise safety across your fleet, meaning that you will be able to:

- Gather, monitor and interpret your fleet data more effectively
- Manage your fleet and your grey fleet (Grey fleet is where a driver uses their own vehicle)
- Ensure you are fulfilling your obligations relating to health and safety

Your drivers will be given a 3 hour training course to develop their ability to drive safely whilst minimising the environmental impacts of vehicle use and improving their fuel consumption.

To book your free place contact Eco-Business Driving on **0114 360 0484** or email enquiries@eco-businessdriving.co.uk

What Organisations are saying:

All 23 drivers that took part gave excellent feedback, saying that they really enjoyed the training and felt it was very informative and well presented. Our initial figures are showing an increase of approximately 5% on miles per gallon achieved by our vehicles. That's almost a £2500 saving on our yearly fuel spend and almost 2000 litres less fuel.

We anticipate further savings on maintenance costs, especially tyres, on the 16 vans that we currently use. As an incentive to our drivers we are appointing a monthly fuel champion for the driver showing the biggest increase in MPG, with a prize of a high street shopping vouchers.

We thoroughly recommend the Eco-Business Driving training course. It is a win, win situation. Save on fuel – save of maintenance costs. Increase speed awareness, road safety and above all it's free.
