The business case for joining eDriving Solutions is simple but compelling

Membership allows you to sell, or give away the resources on our site directly to your pupils. You keep all the income for these sales, all you pay is a membership fee of £36.00 per year.

In simple numbers let's say 30* pupils in a year paid you £10 for 2 months access to the system (so £5 per month which seems to be the going rate among our membership), this would increase your income by £300 a year, a profit once your membership fee is removed of £264!!! The advantage of access to the system for the pupil is that they no longer have to buy expensive discs and books but can access learning resources directly off the web including the Official DSA Theory Test Question Revision Bank and practice HPT clips.

But of course driving instruction is much more than simple financials, it is about Road Safety. The e-learning modules and assessments have been designed to enhance a driver's safety. So the instructor wins, the pupil wins and road safety wins. There a few things in life that this could be said about.

With thousands of pupils now registered on the system and enjoying the benefits of eDriving Solutions it is worth just pointing out that not only do the pupils benefit through access to the Official DSA Theory Test Question Revision Bank and the practice HPT clips, eLearning modules and unique video based assessments, but instructors also benefit from: CPD e-learning modules and downloadable business products. These instructor products and services allow you to decrease your costs, whilst the learner products and services increase your income.

Can you really afford to be without us?
